## Electric insert keep for insert locks

This innovative electric keep pushes the latch bolt outward and allows flexible positioning within the post. UNILEC fits perfectly into the UNIWINING profile preparation and is easily mounted with the CLICK-IT system. The sleek finish minimizes the gap between gate and post. The keep operates on 24V DC and is available with or without a stop plate. Extra security is ensured by the Fail-Close functionality.

## What makes it special?

- Pushes day bolt outward
- Integrated Click-It installation system
- UNIWINING-compatible
- Easy left or right changing
- Adjustable stop plate for 40 mm till 50 mm gate frames
- Compatible with FORTY-, FIFTY-, SIXTY- & EIGHTYLOCK
